

FAST FORMATION PROFICIENCY REPORT

One of the most important responsibilities of the Lead Pilot is to document the currency and competency of the formation pilots with whom he/she flies. The Lead Pilot may provide additional training if necessary, and ensures that any pilot he/she has certified as current, has participated in a formation flight in a safe and standardized manner in accordance with FAST standards. By signing this form, the Lead (or Check) Pilot certifies that he/she has flown with and observed the listed pilots and verified that, on the date indicated on this form, they met those standards. If any pilot in the flight was unable to perform to the required FAST standards, his/her name should not be listed. A Lead Pilot cannot certify his/her own currency; another Lead or Check Pilot in the flight must do so. Also, a Lead Pilot must lead the flight for which he/she is being endorsed.

Place:		Date:	
Printed Names of Participating Pilots		Type A/C	Participating Pilot's Signatory or Signatories (see list of signatories below) and Member Number (if used by his/her signatory)

4			

Total number of pilots being endorsed by this report, including attached forms, is _____.

Lead or Check Pilot's name: _____ Signature: _____

Only one report per formation pilot is required each calendar year. Since there is no national database, a *Formation Proficiency Report* should be forwarded to **EACH** organization to which the pilot belongs – see the list below. The pilot(s) who are being certified by this form should check each organization in which he/she is a member, and it is his/her responsibility, not the Lead or Check Pilot's, to insure that the signed form is mailed to the appropriate organization(s).
