

AIRSPACE PLANNING

This is a brief overview of how many RPA formation training clinics conduct their airspace plan.

MOA: Military Operating Area
We will use the same terminology.

Basic MOA "Bullseye" System

Simply place the "bullseye" on the airfield and section the airspace based on headings (bearings) and range restrictions. After departure, aircraft can turn direct to the heading leading to their MOA. Print up a few copies of the plan with frequencies and your all set.
